

UNNATI MANDALIYA

TECHNICAL PROJECT MANAGER | FORMER PHP DEVELOPER | TECHNICAL TEAM LEAD

AI-enabled Technical Project Manager and Team Lead with 9+ years of experience in software development and project delivery. Proven expertise in leading cross-functional teams, managing client relationships, and delivering web and mobile applications using Agile methodologies. Skilled in project planning, SDLC, stakeholder management, risk mitigation, technical architecture, PHP, Laravel, MySQL, and REST APIs. Experienced in integrating AI-powered productivity tools, including ChatGPT, GitHub Copilot, and Microsoft Copilot, into daily workflows for requirements analysis, sprint planning, documentation, code assistance, project reporting, meeting notes, and decision support, enabling faster delivery, enhanced collaboration, and high-quality outcomes.

PROFESSIONAL SUMMARY

- Technical Project Manager and Team Lead with 9+ years of experience in software development, technical leadership, and successful delivery of web and mobile applications.
- Strong technical foundation in PHP, Laravel, MySQL, RESTful APIs, and modern backend architecture, with expertise in building scalable, secure, and high-performance solutions aligned with business objectives.
- Proven ability to lead cross-functional development teams, make strategic technical decisions, and drive end-to-end project execution using Agile and Scrum methodologies.
- Experienced in mentoring engineering teams, improving code quality, optimizing development workflows, and ensuring timely, high-quality project delivery.
- Skilled in designing and managing backend integrations, API ecosystems, and performance optimization for complex, data-intensive applications.
- Strong expertise in stakeholder management, client communication, project planning, risk mitigation, resource allocation, and translating business requirements into effective technical solutions.
- Proficient in leveraging AI-powered tools such as ChatGPT, GitHub Copilot, and Microsoft Copilot for requirement analysis, project planning, technical documentation, code reviews, development assistance, meeting summaries, and workflow automation to enhance productivity, delivery speed, and solution quality.
- Committed to continuous learning and adopting AI-driven engineering practices, modern technologies, and process improvements to foster innovation and deliver measurable business value.

TECHNICAL SKILLS

JavaScript Vue.js jQuery Agile Scrum Nodejs Python Programming Data Analysis & Data Visualization
Machine Learning Fundamentals NumPy, Pandas, Matplotlib, Seaborn REST APIs & Git Version Control Statistical Analysis
Predictive Modeling PHP, Laravel, MySQL Jupyter Notebook Scikit-Learn Data Cleaning & Preprocessing SDLC
Stakeholder Management Sprint Planning Resource Planning Client Management Delivery Management Project Estimation Jira
Trello Docker ChatGPT Gemini Claude GitHub Copilot Canva AI

SKILLS

Core Competencies: PHP Development, Laravel Framework, CakePHP, Backend Architecture, RESTful API Development, MySQL Database Design, Web Application Development, Performance Optimization, System Debugging, Code Refactoring, Software Design, Agile Methodology, Technical Project Coordination, Git Version Control, AWS Basics, API Integration, Database Optimization, Project Lifecycle Management, Stakeholder & Client Communication

Soft Skills: Communication, Leadership, Problem Solving, Collaboration, Adaptability, Team Mentorship, Time Management, Analytical Thinking, Client Interaction, Decision Making, Accountability, Conflict Resolution, Continuous Learning

WORK EXPERIENCE

Technical Team Lead

V3 Cube Innovations Pvt Ltd (Remote) (Oct 2025 - Present)

- Managed project resource planning, capacity allocation, and effort estimation to ensure timely and cost-effective project delivery.
 - Optimized resource utilization and workload distribution across cross-functional teams to meet project milestones and business objectives.
 - Coordinated with stakeholders and development teams to align resource availability with project priorities and delivery schedules.
 - Monitored project progress, identified resource constraints, and mitigated risks to maintain delivery commitments.
 - Planned sprint capacity and team assignments in Agile environments to maximize productivity and ensure predictable delivery.
 - Leveraged AI-powered tools for project planning, effort estimation, meeting summaries, and documentation to improve team efficiency and decision-making.
 - Tracked team performance and project metrics, enabling proactive adjustments to resource allocation and project timelines.
 - Collaborated with technical leads and management to balance project demands, optimize team capacity, and support organizational goals.
- Leading a team of developers while managing end-to-end project delivery lifecycle
 - Acting as primary client point of contact for requirement gathering, planning, and execution
 - Defining project scope, timelines, and deliverables ensuring alignment with business goals
 - Managing task allocation, sprint planning, and delivery tracking in Agile environment

- Identifying and mitigating project risks, bottlenecks, and dependencies
- Ensuring on-time delivery with quality standards across multiple projects
- Driving backend architecture decisions and scalable system design
- Mentoring team members and improving development efficiency

Achievements:

- Delivered multiple projects with end-to-end ownership and on-time delivery
- Improved team productivity by streamlining development and communication workflows
- Reduced system response time through optimization (30% if possible)
- Increased sprint predictability by 25%.

Independent Technical Consultant & Skill Development

- (May 2024 - Sep 2025)

- Focused on project planning, system design, and backend optimization
- Gathered client requirements and recommended suitable technology solutions.
- Completed certifications in Project Management and AI Essentials
- Strengthened expertise in technical documentation, stakeholder communication, and delivery processes
- Leveraged AI tools like ChatGPT and GitHub Copilot to enhance productivity, documentation, and development workflows.
- Continuously explored new technologies and AI-driven solutions to improve efficiency.

Senior PHP Developer

Teamware Solutions (Jan 2023 - May 2024)

- Architected and delivered **scalable backend systems** using **Laravel**, ensuring **high availability, performance optimization, and maintainable architecture**.
- Owned the **end-to-end backend development lifecycle** including **requirement analysis, technical design, development, testing, deployment, and production support**.
- Led backend execution across **cross-functional teams**, collaborating with **Python developers, project managers**, and stakeholders.
- Designed and optimized **RESTful APIs** and **MySQL database queries**, reducing **API latency** and improving **system response time**.
- Performed **backend performance tuning, code refactoring, and database optimization** for enhanced scalability.
- Participated in **technical architecture planning, framework selection, sprint execution, and delivery management**.
- Acted as **interim project coordinator**, managing **client communication** and delivery tracking.
- Mentored junior developers on **coding standards, debugging, and secure backend practices**.
- Ensured adherence to **Agile/Scrum methodologies**, improving sprint efficiency and predictable delivery.
- Supported project planning, estimation, and sprint execution
- Coordinated with stakeholders to ensure timely delivery

Senior PHP Developer

Rlogical Techsoft Pvt. Ltd. (Dec 2020 - Jan 2022)

- Developed enterprise and web applications using **CodeIgniter, WordPress, Laravel, and Node.js**, ensuring scalable and maintainable backend architecture.
- Translated client requirements into **optimized system designs** and modular backend components for diverse project needs.
- Managed technical communication between cross-functional teams and stakeholders, ensuring timely delivery.
- Executed **backend debugging, issue resolution, and performance optimisation** across multiple platforms.
- Enforced **clean coding standards, reusable architecture, and comprehensive documentation practices**.
- Conducted **code reviews** and mentored junior developers to enhance team capability and code quality.

Software Developer

Global Garner (Oct 2020 - Nov 2020)

- Built secure and maintainable **PHP web applications** focused on **performance and stability**.
- Collaborated with project managers to align development with **business deliverables**.
- Participated in **structured code reviews** to reduce defects.
- Resolved **complex technical issues** and stabilized production deployments.

Software Developer

KGN Technologies (Mar 2020 - Aug 2020)

- Designed full-stack **PHP solutions** from concept to deployment.
- Streamlined development through **cross-team collaboration**.
- Debugged and enhanced **application functionality**.
- Contributed to **feature design** and scalable implementation.

Software Engineer

Einvensys (Jan 2019 - Mar 2020)

- Independently managed **website development, deployment, and maintenance**.
- Monitored **system performance** and resolved production issues.
- Ensured applications met **technical and usability standards**.

PHP Developer

Siddhi Infosoft (Dec 2017 - Dec 2018)

- Developed full-stack applications using **multiple PHP frameworks**.
- Implemented **frontend-backend integrations**.
- Delivered **end-to-end web solutions** aligned with client requirements.
- Built reusable and adaptable modules.

Senior PHP Developer

Equos Infotech Pvt. Ltd. (Aug 2016 - Nov 2017)

- Architected **PHP-based web platforms** using structured engineering practices.
- Contributed to **system architecture design**.

- Ensured compliance with **coding standards** and performance metrics.
- Collaborated across teams to meet milestones.

Trainee – ASP.NET & SQL Server

APPIN Technology Lab (Aug 2012 - Sep 2014)

- Completed hands-on training in **web application development**.
- Built foundational knowledge in **software architecture** and coding principles.
- Gained exposure to real-world development environments.

ACHIEVEMENTS

- Delivered multiple **high-performance web applications** on time, enhancing **system reliability** and **client satisfaction**.
- Optimized **backend architecture and databases**, improving **application speed, scalability, and stability**.
- Mentored developers, enforced **coding standards**, and strengthened **team efficiency**.
- Translated complex requirements into **efficient technical solutions**, enabling **seamless project delivery**.

PROJECTS

E-Campus Platform | Project Lead

- Designed and developed an offline academic portal using ASP.NET and **database-driven backend systems**, enabling a centralized repository for **question paper management**, secure upload/download workflows, and optimized data handling.
- Led end-to-end **backend development**, system structuring, and feature implementation, ensuring **scalable application design**, smooth user experience, and reliable performance aligned with institutional requirements.

CERTIFICATIONS

- **Python for Data Science and Machine Learning Bootcamp** (Udemy - 2026)
- **Leadership Skills** (Coursera - 2025)
- **Crash Course on Python** (Coursera - 2025)
- **Google AI Essentials** (Coursera - 2024)
- **Foundations of Project Management** (Coursera - 2022)

EDUCATION

Bachelor of Technology (2015)

Sigma Institute of Engineering & Technology, Vadodara, Gujarat

LANGUAGES

English, Hindi, Gujarati
